Installation & operating instructions

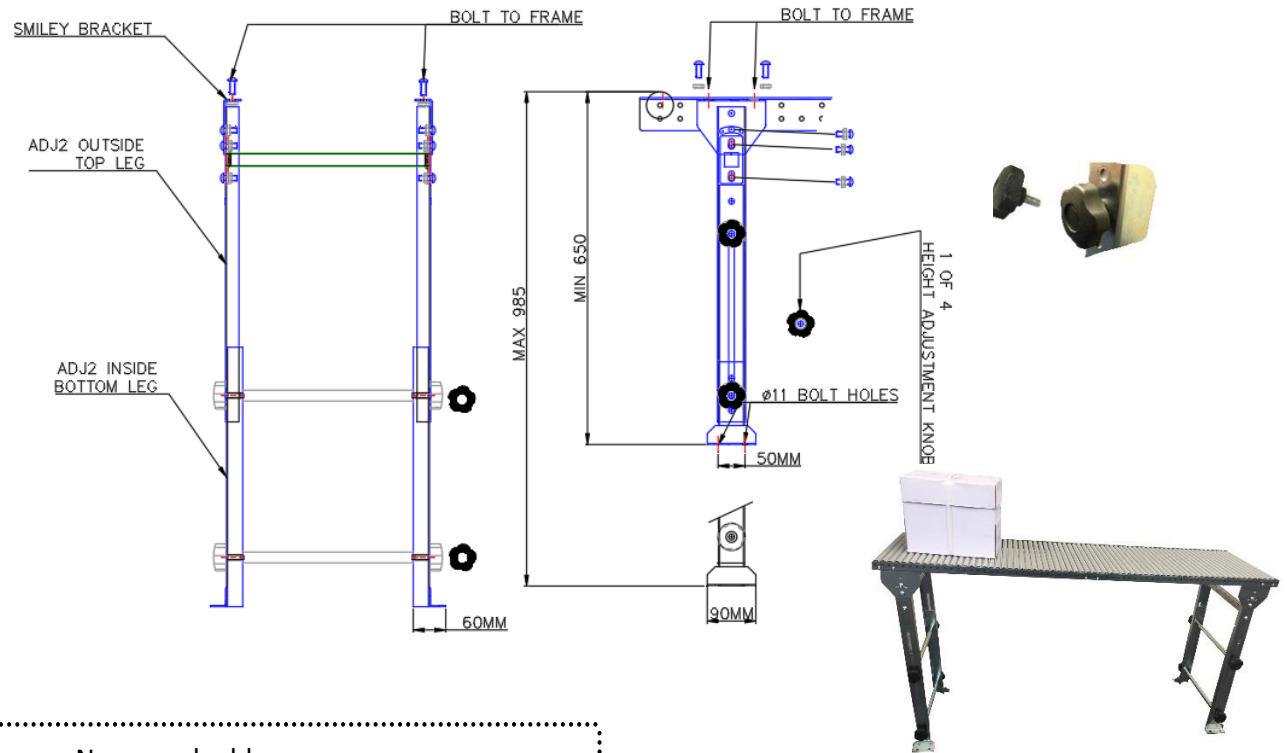

Remove packaging & check all fasteners are secure.

If the conveyor was ordered in two or more sections, they will need to be connected using the stand smileybracket to join linear lengths together

Stands are for Gravity Flow or set Parallel and adjust to within operational the height stated, using stand cross-tie M.

For gravity flow (camber), lock stand upright to using smileybracket "Smile" & bottom location holes, set infeed height then adjust out-feed height to give desired flow.

For Parallel (horizontal): Lock stand upright using top & bottom smileybracket location holes
